

Georgi Landzhev

QA Engineer | Payments & iGaming

QA Engineer with 6 years of experience across iGaming, mobile gaming and embedded automotive systems. Currently testing payments and back-office flows for a Canadian online casino: deposits, withdrawals and in-app shop purchases via Interac, Apple Pay and card payments (Worldpay, Nuvei). Strong in manual and API testing, database validation and log analysis. Builds Playwright (JavaScript/TypeScript) UI and API automation, using AI-assisted development. Master's in Information Security, SoftUni-certified QA Automation Engineer and ISTQB Foundation Level certified.

WORK EXPERIENCE

Manual QA Engineer - Payments & BizOps

Betty Technology

Feb, 2026 - Present | Sofia, Bulgaria

Tasks

- Test end-to-end payment flows: deposits, withdrawals and in-app shop purchases.
- Validate integrations with Interac, Apple Pay and card payment providers Worldpay and Nuvei, including declines, refunds and edge cases.
- Test back-office tools used by operations, payments and support teams.
- Test REST APIs with Postman and verify transactions and account data in the database (DBeaver, SQL).
- Investigate defects in OpenSearch logs and provide developers with clear root-cause evidence.
- Write and maintain test cases and test runs, log and track defects in JIRA.
- Build automated UI and API tests with Playwright (JavaScript/TypeScript), using Claude Code for AI-assisted test development on GitHub repositories.
- Use browser DevTools to inspect network requests, console errors and front-end behavior.

Manual QA Engineer

Imperia Online

Jul, 2025 - Dec, 2025 | Sofia, Bulgaria

Tasks

- Improved test coverage and defect tracking efficiency through structured test case documentation and close collaboration with developers.
- Performed manual testing of mobile applications across Android and iOS devices.
- Validated software functionality against business requirements and functional specifications.
- Created test plans and logged, tracked, and verified defects using JIRA.
- Ran regression testing as part of an Agile/Scrum team, working closely with developers.
